Modern Elegance

The Oak Canberra Duo is a high quality folding sliding door, which has stood the test of time. The Canberra is now relaunched as the 'Duo' range offering an extensive choice of special sizes and specifications. For all modern living, this patio door range offers style and elegance and opens your room up to more space and extra light.

The sliding operation of the doors allows you to smoothly open fully, letting your inside space be part of the outdoors. When closed, the full height glazing allows the sunlight in to the maximum, allowing you to benefit on both summer and winter days.

Whether you have a traditional or contemporary style home, the Canberra Duo will fit beautifully.

Canberra features

The Canberra Duo is made from high quality oak on an engineered timber core and is available in a wide range of colours with long life guarantees on our fully finished product. The hardware is available in 2 different colours; just let us know which one will enhance your home. The patio is designed to keep the worst of the British weather at bay.

The doors are fixed through the head directly into the lintel, which holds the doors and mechanism in place. The head track has pre-drilled clearance holes for structural fixings to go through the lintel. The doors are hung on pre-fitted wheeled carrier sets, allowing the smooth operation. The doors simply slide and fold against each other into the corner of the frame and are available in several folding configurations, depending on the width, of 3, 4, 5 and 6 leaf.

The frame is supplied in a pack for site assembly. The doors are supplied glazed, pre-drilled and packed separately. Full fitting instructions are supplied for on site assembly - also available on the JELD-WEN website: www.jeld-wen.co.uk
