

2021

Door Collection

WELCOME

New designs, expanded ranges and trusted favourites... there is something for everyone in our 2021 Door Collection.

Celebrating the appeal of 'industrial style' interiors, our sleek new Urban Industrial range (p16-21), oozes cool city-living. Whether you choose them in black or white, glazed or not, the City and Metro door designs are perfect for modern, sophisticated homes.

Some ranges have been expanded to offer even more choice. Our new Palomino (p29) is the latest addition to our Oak Contemporary range. This popular ladder style design, offers a competitively priced unfinished oak veneer alternative. New to our ever-popular Laminates range is the Tigris Cinza (p69). Building on the success of our Alabama Cinza, this dark grey laminate is now available in our top-selling Tigris design.

The classic shaker style never dates, so we have introduced a new Rushmore White (p101), a fresh alternative for our long-standing favourite, the Rushmore Oak.

So, whatever your taste and budget, you're certain to find your ideal door design within these pages.

Architects, Specifiers and Designers

Our dynamic door designs offer undeniable value as well as compliance with a wide range of UK and European industry standards. From fire protection and thermal insulation to renewable resources and disabled access, you can rely on JB Kind to provide the quality standards you need. We have recognised third party accreditation from schemes such as Certifire and FSC® chain of custody.

If you have any questions or need some expert advice, don't hesitate to call us on 01283 554197.

We've a rich heritage in timber products

Initially a timber merchant and box manufacturer based in Burton-on-Trent, our founder John Blower Kind established the business in 1870.

150 years on and we're still going strong!

JB Kind's business has always diversified and moved with the times, including manufacturing goods for the military during both World Wars and more recently timber pallets.

In 1983, JB Kind introduced a new line of business, a door division! Offering a new and innovative approach to supplying affordable, quality door designs proved so successful, the business turned exclusively to doors in 2007 and we haven't looked back since!

Like to know more about our history? Visit jbkind.com/about/history

Today, we offer more than just doors

At our purpose built head office and distribution centre in Derbyshire, we offer a number of different door related products and services.

Whether you require tailor made bespoke doors in a different design or size, pre-assembled internal doorsets or a professional spray paint finish service in any colour you like - we can help.

Space saving pocket door systems that are easy to install and an attractive selection of handle packs that include everything you need to fit a door, are also available.

In-house Joinery service

Our team of experienced joiners offer a range of services related to door installation. These include, glazing FD30 fire doors and rebating doors into pairs.

Certifications & Memberships

Our dedication to meeting the highest standards for our customers is illustrated by our continuous achievement of the UK quality standard to the ISO9001 accreditation. In addition, we are affiliated to the British Woodworking Federation (BWF) and Timber Research and Development Association (TRADA) which together set the industry standards for the supply of wood products into the UK.

Look for FSC® certified products

FSC® Certified chain of custody door supplier

We hold our own FSC® chain of custody certification for certain doors within our collection. Chain of custody certification ensures that the systems within our business allow us to track the door from the day we buy it, through to the day we deliver it. Wherever you see FSC® Certified within a product description that door has been produced from certified materials and other controlled sources.

The largest display of JB Kind doors in the UK

At our showroom we welcome visitors from across the UK to view the largest range of JB Kind doors in the country.

BOOK TODAY...

Please call 01283 554197 to make an appointment or complete our online appointment form.

From architects and specifiers, to developers, self builders and renovators, we offer exclusive access to the showroom, Monday to Friday on an appointment only basis.

Based in Swadlincote, South Derbyshire, JB Kind's showroom is conveniently located just 10 minutes from either junction 11 or 13 on the M42.

You will be able to view more than 70 doors on display from our latest and most popular door ranges, as well as a double pocket door system, a working bi-fold door and rebated door pair.

View our Virtual Showroom tour at jbkind.com/about/door-showroom

Alternatively, we have many partners throughout the UK with our doors on display, so please consult us for the closest to you or visit our online Supplier Locator.

Builders merchants and door retailers

Our doors can be ordered from Builders Merchants and Door Retailer partners across the UK and buying your JB Kind doors is now even easier with our online [Supplier Locator](#).

Just go to www.jbkind.com and put in your postcode to find the closest retailer to you – we also tell you which outlets have JB Kind door displays so you can take the time to go and experience just how fabulous our doors really are!

Buy online

If you already know exactly what you want and you like the ease of ordering online, then just pop onto our website and check out the buy online section with links to our approved [Online Partners](#) - then you're just a click away from receiving your dream doors.

NEED ADVICE?

Sometimes you'll need advice and we are always here to help. Just give us a call on 01283 554197 or email info@jbkind.com

Let's get Social

Join our online community and follow us on Social media for inspirational ideas, product information, news and much more.

Why not share photos of your projects? We love seeing our doors in their new homes.

Plus, you can chat with our team, who are always happy to offer help and guidance.

YouTube

Seeing is believing! For more inspiration, pop along to our YouTube channel. You'll find videos on many of our product ranges, as well as helpful 'How to' guides and tours of our headquarters and showroom.

HOW TO CHOOSE YOUR DOORS

Measuring up

To make sure you purchase the right door sizes, take the following measurements.

Door width: measure the top, middle and bottom of the door frame. The widest measurement determines the width of the door.

Door height: measure inside the vertical side of the frame. The longest length determines the height required. Remember to make allowance for any floor covering.

NB. You can plane door edges slightly to reduce the size. If required, please call us for details of the lipping size.

Door size conversion chart: A little help if you need to work out the metric and imperial equivalent for door sizes.

Height & Width

Metric (mm)	Imperial (inches)	Imperial (feet & inches)
1981 x 457	78" x 18"	6'6" x 1'6"
1981 x 533	78" x 21"	6'6" x 1'9"
1981 x 610	78" x 24"	6'6" x 2'0"
1981 x 686	78" x 27"	6'6" x 2'3"
1981 x 711	78" x 28"	6'6" x 2'4"
1981 x 762	78" x 30"	6'6" x 2'6"
1981 x 838	78" x 33"	6'6" x 2'9"
1981 x 915	78" x 36"	6'6" x 3'0"
1981 x 1067	78" x 42"	6'6" x 3'6"
1981 x 1168	78" x 46"	6'6" x 3'10"
1981 x 1220	78" x 48"	6'6" x 4'0"
1981 x 1372	78" x 54"	6'6" x 4'6"
1981 x 1524	78" x 60"	6'6" x 5'0"
2032 x 813	80" x 32"	6'8" x 2'8"
2134 x 915	84" x 36"	7'0" x 3'0"
2040 x 526	80 1/4" x 20 11/16"	6'8 1/4" x 1'8 11/16"
2040 x 626	80 1/4" x 24 5/8"	6'8 1/4" x 2'0 5/8"
2040 x 726	80 1/4" x 28 5/8"	6'8 1/4" x 2'4 5/8"
2040 x 826	80 1/4" x 32 1/2"	6'8 1/4" x 2'8 1/2"
2040 x 926	80 1/4" x 36 7/16"	6'8 1/4" x 3'0 7/16"

STEP 1

Choose your preferred door style

Browse through and select your favourite door designs, colours and finishes. Not forgetting, a matching glazed partner, should you wish to add some extra light. Take inspiration from our Gallery of lifestyle images online at jbkind.com

STEP 2

Check the sizes available

If one of our standard door sizes does not fit your requirements, check if a special size can be ordered through our [B5](#) Bespoke Options service, [page 11](#).

STEP 3

Consider how the doors will be fitted

- Do you need any door pairs? If so, take a look at our Door Pair rebating service [page 15](#).
- Would a Pocket Door System help create some extra space? Ideal for renovation and new build projects, see [pages 112-115](#).
- Will you require any fire doors? Virtually all of our door designs offer an FD30 fire door option. See below.
- A pre-hung Doorset complete with frame and ironmongery could be better suited to your project. If so, see [pages 14-15](#).
- Ensuites, wardrobes and cupboards often require a space saving solution. Consider a matching bi-fold option, pocket door system or invest in some sliding door tracking.

STEP 4

Pick the right handle

A stylish handle really does finish off a door. Take a look at our Door Handle Packs, [pages 116-117](#), supplied with everything you need to fit a door.

STEP 5

Price up your doors

JB Kind's doors can be purchased through Builders Merchants and Door Retailer partners across the UK, any of which will be happy to provide a quote.

Either call us on 01283 554197 for details of your local supplier or visit our online Supplier Locator at jbkind.com. Alternatively you can Buy Online via one of our approved Online Partners and your doors will just be a click away.

Fire Doors

Fire doors are a serious business, and that's why we invest our time, energy and money to ensure that we have one of the most comprehensive, and accredited, collections of fire doors in the UK.

As responsible suppliers of fire resistant doors, we ensure that all of our FD30 doors have been tested in accordance with either the British BS476 pt22 or European EN1634-1:2000 standards.

All of our fire doors have a Fire Test Assessment report which is available upon request and outlines in detail exactly what you can and can't do when fitting any particular door. All fire doors are glazed with fire-rated glass.

FD30 fire door pairs: please note that not all FD30 fire doors offered within this brochure are certificated for use as pairs. Please contact us for more information.

For more information on fire doors, including details on Glazed Fire Doors & Part M (Mobility) visibility requirements, log on to jbkind.com or call 01283 554197.

Finding your fire doors

Look out for the or icons that are adjacent to product codes throughout the brochure.

For a more detailed breakdown of the fire door options by range. See our online 'At a Glance Guide' that shows the standard stock and bespoke options for both solid and glazed FD30 fire doors, at jbkind.com/info-centre/fire-doors

Certificated Fire Doors

Fire doors certificated by Warringtonfire are identified by CertifiRE FD30 Fire door. JB Kind's membership of the BWF Fire Door Alliance Scheme supports the promotion of third party certification.

OUR SERVICES

Bespoke Options

Colour Options

Internal Doorsets

Rebated Door Pairs

Need to know more about any of our services or wish to order?
Call 01283 554197 or email info@jbkind.com

Bs Bespoke Options

Whether you're self-building, renovating your home, purchasing for a development project or you're an interior design expert, you'll want to take a look at JB Kind's bespoke options. The versatility of our bespoke service is ideal for those special requirements.

Many of our door designs have bespoke options available. Look out for the **Bs** icon adjacent to product images.

Make your mark

Perhaps you love one of the designs from our Door Collection but would prefer it in a different timber veneer or painted finish, or maybe you would like to create a style that is completely unique and different?

More veneers and painted finishes can be viewed online at jbkind.com.

MADE TO MEASURE

There are a wide range of standard door sizes available, however, sometimes you just cannot avoid an awkwardly sized door opening.

Many of the doors from our collection can be produced to order as a special size.

BESPOKE GLAZING

Whether you prefer a full glazed panel or smaller apertures, there are so many options for a glazed door. Clear, bevelled, diamond cut and etched are some of the most popular glazing types. Let us know what you would like to achieve and we'll advise on the options.

FIRE DOORS

JB Kind can supply bespoke fire doors, in a wide range of solid and glazed options. Supported by the appropriate accreditations, you can be safe and stylish.

Colour Options Paint Service

All the colours of the spectrum

Bring colour to your home and make a style statement by painting your doors any colour you like!

Painting doors can be fiddly and time consuming, so let us take the hassle away and arrange for your doors to be professionally spray painted prior to delivery. All you have to do is tell us your preferred RAL Classic colour and we will do the rest.

Our White Classic, White Moulded and External Extreme door ranges are suitable for this service – look out for the  icon as you browse through the brochure.

Note: Our painting service typically takes 3-4 weeks including delivery. Touch up kits are available to order. Colours shown are representative only. Please be aware that the appearance of RAL colours can vary depending on the absorbency level of the door face. Subject to terms and conditions.

BENEFITS

Save time

No need to prepare (de-nib/sand) doors prior to painting and paint several coats on each side, allowing for drying time too!

Cost saving

Eliminate the cost of purchasing paint and equipment, plus labour if you employ someone to do the job for you.

Perfect finish

Spray painting gives a smooth factory finish without brush marks or uneven coverage.

Colour choice

You really can have any colour on the RAL Classic spectrum. Even if you would like to paint your doors a shade of white, we will ensure they have the perfect finish.

Spray painting gives a smooth factory finish every time - no brush marks or uneven coverage.

Quattro in RAL 7016 Anthracite Grey

Ripple Glazed in RAL 7030 Stone Grey

Osborne in RAL 1019 Grey Beige

Cottage 5 in RAL 7044 Silk Grey

Belton Clear Glazed in RAL 5008 Grey Blue

Most popular RAL colours

The RAL Classic colour chart offers many different shades, so you should be able to find your perfect hue. As a guide, here are some of our customers favourites and you'll see that shades with a grey undertone are currently very popular.

9010 Pure White

7030 Stone Grey

5008 Grey Blue

6004 Blue Green

5011 Steel Blue

7003 Moss Grey

7016 Anthracite Grey

7044 Silk Grey

1019 Grey Beige

9005 Jet Black

Internal Doorsets

All of our internal doors, including fire doors, can be supplied as factory pre-assembled Doorsets. The perfect door solution for self builds, new housing and apartment developments.

BENEFITS OF A DOORSET

- Save time**
Each Doorset is pre-hung and ready to install*.
- Labour cost saving**
Quicker fitting times help reduce onsite costs.
- Single sourcing**
Ease of purchasing all door related components in one place.
- Fully certificated**
Peace of mind that each Fire and Security rated Doorset is fully compliant.
- Factory controlled**
Each Doorset is assembled in a factory environment to ensure consistency and quality.

What's in a Doorset?

- 1 Hinges fitted
- 2 Door leaf
- 3 Latch/lock fitted
- 4 Frame/lining, complete with door stop
- 5 Floor covering clearance

Architrave is also supplied (not shown): available in a variety of styles

*Doorset pairs are supplied unassembled.

Here's a checklist of the key information that will be required to help us process your enquiry:

- ✓ Quantity required
- ✓ Structural opening heights and widths
- ✓ Wall depth
- ✓ Handing (left or right) as viewed from the pull side
- ✓ Floor clearance (distance from bottom of frame to bottom of door)
- ✓ Type of door – Standard (35/40mm), FD30/FD60 fire rated (44/54mm) and/or Security rated
- ✓ Door design style
- ✓ Frame material and finish – mdf or softwood in primed, lacquered or stained
- ✓ Frame type – rebated or lining
- ✓ Architrave profile and dimensions

Fire rated internal doorsets are available for FD30 and FD60 Fire Doors

Security rated internal doorsets are also available

Rebated Door Pairs

If you would like to fit a first-class door pair, we would recommend considering Rebated Meeting Stiles. Rebating means removing a section along the vertical edge of each door where they meet to allow them to fit snugly together, eliminating the small gap that you would see with square meeting stiles (two doors fitted side by side).

A number of door designs held within our stock ranges are suitable for rebating with a short lead time (see table below). This service is offered through our in-house joinery workshop. If your preferred door type is not listed, please check if our Bespoke Options service is available, as they could be made to order.

Doors that can be rebated into a pair from stock

Range	Door Designs
Urban Industrial	All door designs
Oak Contemporary	Tigris Oak & Medina (sizes: 686 & 762mm)
Oak Classic	Dove Pairs (ready rebated)
Oak Shaker	All door designs (except fire doors & bi-folds)
Oak Cottage	Thames + glazed partners (except fire doors & bi-fold) Yoxall & Tutbury
Walnut	Axis
White Classic	All door designs (except fire doors)
White Contemporary	All door designs (except Ripple) Contact us for fire door options
White Shaker	All door designs (except fire doors & bi-folds)
White Moulded	Classique 6 Light Pairs (ready rebated)

Semi-solid core construction

Painted Finish

A close-up photograph of two brushed metal door handles mounted on a dark grey door. The door has a realistic wood grain texture, which is the subject of the advertisement. The handles are curved and have a circular base plate. The lighting is soft, highlighting the texture of the door and the metallic finish of the handles.

Painted finish doors use state-of-the-art technology to create realistic timber graining in a choice of colours – achieving a perfect, uniform look.

Finish: Painted mid-grey finish with vertical grain
Style: Pintado: Plain flush
 Ardosia: Flush with grey coloured grooves
Glazing: Clear flat safety glass with raised beading
Other: 🔥 Certifire FD30 Fire doors
 If trimming is required the door edges will need retouching. See website for colour match information.

Important:

Moulded panel doors are vulnerable to high humidity. Make sure plasterwork etc. has been allowed to dry out sufficiently before fitting them in new or refurbished homes.

POCKET DOOR SYSTEMS

Colorado

*We always recommend using a professional fitter.

A pocket door system that enables doors to slide conveniently into a wall cavity and save space whilst looking incredibly stylish.

Easy to install* with a rigid frame, our pocket door systems are supplied pre-assembled so that they can be fitted in half the time of other brands.

Available for both single and double door situations in a selection of sizes, almost all of JB Kind's internal doors are suitable for use as a pocket door. You can also choose from a selection of pocket door accessories too!

Key features:

- Easy to install* rigid frame, supplied pre-assembled
- Fitted in half the time of other brands
- Designed for stud and plasterboard
- Door is fitted after all installation and decoration has been completed, avoiding any potential damage to your door.
- Door choice can be changed in the future without structural alteration to the wall.
- Compatible sliding door hardware available
- Available in single and double format

Pocket door cassette:

The cassette structure is made from 0.5mm galvanised steel, with the sides formed from single pieces of pressed steel which is corrugated for complete stability. Transverse ribs fixed to the corrugations further re-inforce the structure and allow fixing of plasterboard direct to the cassette. The internal pocket cavity is protected by a cover during installation.

Spacer bars:

Twin spacer bars are supplied that are fixed between the cassette and jamb during installation to ensure the structure remains square.

Specifications:

Suits door thickness 35mm with a maximum door weight 80Kg.

Mistral Walnut

How to order a Pocket Door System: Your step by step guide

STEP 1

Single or Double Pocket Door System

Use our size guide tables to check your requirements. For a double pocket door, you will need to purchase two single pocket door systems and a double leaf conversion kit.

STEP 2

Choose your door design

The majority of our door designs are suitable for use as pocket doors. However, some doors that have raised mouldings and 44mm fire doors are not suitable. Please get in touch if you're in any doubt.

STEP 3

Timber accessory kits

You will need an accessory kit as the pocket door system cannot be installed without one. Choose from either white primed or varnished oak, available for both single and double options.

STEP 4

Door Grooving

The bottom edge of the door will need to be grooved to fit in the floor guide of a pocket system.

If required, our in-house joinery workshop can pre-groove your doors prior to delivery, for a small charge.

STEP 5

Optional accessories

Automatic Door Closer: is a self-closing system that enables the door to glide into place automatically after being opened.

Double simultaneous operator: enables a double pocket door to open and close simultaneously.

Soft-close damper unit: applies a brake making sure that the door moves slowly and smoothly to a close.

STEP 6

Door furniture

Choose from either a bathroom privacy lock or flush door pull.

STEP 7

Finding a JB Kind door supplier

Take a look at the Supplier Locator on our website or approved Online Partners.

Once you've chosen a place to purchase from, then just hand over all of your requirements and your doors and pocket systems should be with you in no time!

If you do have any questions, our expert JB Kind team is on hand to help you out, just call **01283 554197** or email info@jbkind.com

DOOR HANDLE PACKS

Door Handle Latch Packs the perfect partner for your JB Kind doors

Enjoy the convenience of a stylish door handle latch pack, supplied with everything that you need to fit your door in one box. Each pack comes with a pair of handles, a smartlatch, a choice of keeps and three quality stainless steel ball bearing hinges.

Privacy latch packs with revolutionary push button, available in all handle styles. No requirement to purchase or fit a separate bathroom lock.

With a 10 year parts and mechanism guarantee, the premium stainless steel and zinc diecast construction provides that all important peace of mind.

PLEASE NOTE: the hinges provided in our latch packs are not suitable for use with fire doors. Fire door hinges are available separately, call 01283 554197 for details.

Smartlatch: Fit in under five minutes

Step one: Using a 25mm drill bit, bore out to 75mm in depth.

Step three: Then simply insert the latch.

Step two: Using the same bit, drill the hole for the spindle.

Step four: Fit handles.

Tigris Glazed Extreme, shown painted

Our External Extreme door range has revolutionised the replacement front door market!

Constructed with an exceptionally durable and dimensionally stable top layer of MEDITE®TRICOYA®EXTREME and sealed with a factory applied paint finish, ensuring that the doors can withstand all weathers – and to illustrate just how confident we are, we issue every External Extreme door with a 10 year guarantee!

All External Extreme doors are:

- Weather resistant
- Supplied with a 10 year guarantee
- Suitable for fitting in a day!
- Supplied with a weather bar
- Perfect for over painting

Watch TV presenter Roger Bisby, as he fits an External Extreme door.

Please refer to [jbkind.com](#) for further details

Colour Options paint service

Front door colours are very much a personal choice. External Extreme doors are supplied pre-finished in white but can be easily over painted, should you wish to achieve a specific colour.

Let us take the hassle away

Tell us your preferred RAL Classic colour reference and we will arrange for your door to be spray painted with a quality exterior finish. See [pages 12-13](#).

Traditionally used for cladding and facias, MEDITE®TRICOYA®EXTREME's hard-wearing and weather resistant properties make it perfect for use within the structure of external doors.

DURABLE
Longer lasting, perfect for external use.

PERFECT FOR COATING
Improved stability and durability enhances service life of the coating. Damaged coating will not affect the core.

SUSTAINABLY SOURCED
FSC® Certified. Wood used from sustainable sources.

ENHANCED STABILITY
Swelling and shrinking dramatically reduced.

LOWER MAINTENANCE COSTS
Extended periods between exterior coatings maintenance.

RESISTANT TO FUNGAL DECAY
Effective barrier to fungal decay.

Essential Door Care & Maintenance Advice

The principal enemy of timber doors is excess exposure to moisture or dryness. Having left our custody, we have no control over the conditions to which they are subjected and to avoid any subsequent cause for disappointment, we strongly advise the following advice is heeded. If suitable care and treatment is not taken to prevent the free passage of moisture either into or out of the wooden door, stresses within timber may be released resulting in movement or distortions such as swelling, shrinking, warping, splitting, twisting or even discolouration. We are unable to accept any liability for any failings where they have arisen due to the free passage of moisture.

Storage

Upon receipt, check your doors carefully for condition and suitability, as claims made later may not be considered. Please store doors laid flat, fully supported off the floor with at least three full width bearers of the same dimension in a dry fully ventilated area, with protective packaging intact. Doors supplied unfinished should be thoroughly sealed on all faces and edges prior to the commencement of any joinery work, although first sizing them may be to advantage. We recommend that veneered doors are sealed using Manns Extra Tough Interior Varnish or Manns Door oil.

Wood finishes

There are numerous brands on the market and we fear many are formulated to achieve a low market price rather than quality. We have tested Manns Extra Tough Interior Varnish and Manns Door Oil which have produced excellent results. For this reason we strongly recommend the use of one of these two finishes to help protect the guarantee. Either of these two finishes will provide a lasting seal between component parts. Good quality solvent or acrylic finishes may be used, but check they are suitable for use with timber laminates or veneers. Follow the treatment manufacturer's instructions carefully and avoid over applying the treatment, particularly the first coat.

We recommend keeping a copy of the claims made for the product in the event it fails to perform. It is vital all finishing systems are applied equally to both sides and edges at the same time. Rapid changes in ambient moisture are extremely detrimental especially when unbalanced.

Natural oils such as Danish oil, tung oil and linseed oil are not suitable for use with any of our products. These solutions are penetrating oils and are not suitable for use with veneered doors. The application of a base coat stain or paint primer alone is not deemed to form a seal. Failures related to treatment will be assessed based on their application and the claims made by their manufacturer.

Installation

Check the door for suitability prior to commencing work. Claims made later may not be considered. When trimming doors, reduce them equally and not excessively from the top and bottom for height, to the hanging edge only for the width, if minimal, but equally with the meeting edge if a greater amount is necessary.

Recesses for hinges (3 No. 75mm internal, 3 No. 100mm external) and mortises for latch/locks etc. should be cut to the minimum recommended sizes. Panel door rail joints will be significantly weakened if mortises are located there. On completion remove doors, taking off all ironmongery and treat every cut/untreated surface liberally with a number of coats of an appropriate treatment before finally refitting. Remember to pay attention to all edges of your door, particularly any exposed end grain where the propensity for moisture is much greater.

Installation - Fire doors

When fitting our FD30 fire doors, please note that there are strict limitations about how much they can be trimmed and these must not be exceeded. Ironmongery used in the installation of fire doors must be strictly in accordance with the door's certification and appropriate for use with a fire door.

Internal door specific

We strongly advise against the installation of all types of timber doors into a building with recent plastered or screeded areas. Wet sites with enclosed unheated buildings represent extremely detrimental environments and must be thoroughly dry, without condensation, before doors are introduced. Even our pre-finished doors should not be exposed to inappropriate damp site conditions.

External door specific

Even in times past, it was never advisable or intended that timber entrance doors be fully

exposed to the worst elements of our climate, even if well coated. A South / South Westerly elevation is the worst direction for the prevailing weather and exposure to the hottest sun which can seriously degrade external doors.

We recommend they are set back from the front face of the building or covered by a canopy or porch way projecting not less than about 1.5m, regardless of elevation. Always fit with a suitable weatherboard regardless of frame cill type fitted, to prevent droplets of moisture hanging from the door bottom.

Future maintenance is most important to retain good appearance over many years and we recommend washing down with warm water and detergent every two to three years and re-coating.

Quality standards

All external and internal doors are supplied in accordance with BS EN 942:2007 "Timber in Joinery General Classification of Timber Quality", BS 5278:1976/EN25:1975 "Doors measurement of Dimensions and of Defects of Squareness of Door Leaves" and BS EN 951:1999 "Door leaves. Method for measurement of height, width, thickness and squareness".

Any claims against warranty relating to manufacture will be assessed strictly in accordance with the criteria contained within.

Any claims against warranty relating to storage, handling or installation of any of our doors will be assessed against guidelines contained within BS8000 part 5:1990 and British Standard Code of Practice CP151. JB Kind Terms and Conditions of Trading apply.

Safety Glass

To comply with building regulations all our pre-glazed doors meet the requirements of the European standards.

IMPORTANT

Wood is a natural material and variations in colour and graining should be expected. Note: With door pairs we cannot guarantee an exact veneer match.

Colours depicted are representative only and are reproduced as accurately as the printing process will allow.

For a perfect finish...

Applying a quality finish to your internal doors ensures their long term appearance and performance.

We recommend the following finishing products that have been tested on our unfinished oak internal doors with excellent results.

Please refer to www.mannsuk.com for more information and to purchase these products directly.

All-in-one natural hard wax oil that dries to a natural, clear matt finish.

Clear, water based varnish that is available in 4 sheen levels.
